

The Paper

Idea. Urdu shayari → Urdu Poets.

Guys professional in shayari

Take snippets → AI

extract part →

sadness, romance, and create
dataset for acting.

2 Reasons

↳ No one has done this

Why This is Imp

↳ You need this for acting.

No existing dataset.

→ create first acting dataset
for urdu, & Train a model.

How To Train a Model.

→ Shreya Model & Dataset.

→ Single GPU voice-to-voice training model. A100, → 1 single.

→ Take that model and feed the data. Model takes a prompt.

→ Shows the dataset first one
→ Receive the glorification for citations.

→ Channels and video links.
extract audio.

→ In shreya people trying to express emotion.
specifically.

→ Poets in urdu on YT.

for every of audio.

↳ annotate the dataset.

ask some human.

↳ Ask Gemini for understanding emotions.

↳ do the stuff for that Qwen.

neworks accepting papers using Qwen.

↳ Qwen use that.

↳ make annotations.

make dataset from a single GPU model.

↳ Dataset first one doing it

Two Things first

How many types of emotions

Jealousy, Nostalgia, Belonging, Power.

Abstract concepts.

and try to site that source
and make that list.

min 5 max 10

Go to Gemini & Qwen
Constructive Prompts

which snippets have this
condition.

→ python file and extract
audio.

↳ how accurate is python file.

Constructive Pipeline,

100-

200 hours of audios.

1-min - fragments.

1000- 2000 snippets

Now we need

Date: _____

Benchmark. 2nd

Train a model.

LAION would make Platform.
200 annotations about annotations.

↳ ~~It~~ Human Judge would
check it.

4 New 2
D Benchmark

② Clarity →

② Hierarchy

③ accent!

④ how close or how
far from Hindi

metric

Perception. Benchmark.

how far → Angle how close or

24 peoples and do that
benchmarks. volunteer work.

last paper projected people.

~~200-200 people.~~

→ How Fast can you do it.

Very Friday

↓

Finish This Away

100-200 Audits
